100mw 405nm Blu-ray Burning Laser Diode

You are bidding on a package of 1 unit of high power 100mw 405nm laser diode. Additional units wi significant shipping discount.

There are numerous uses for high power compact blu-ray laser diodes such as Holographic, and Laser shows technologies. This diode releases powerful photons particles with wavelength of 405nm which is able to genei joules of energy per second. It's is more than capable of lighting cigarettes, melt through foam, pop balloons,

Introduction

Laser diode Wavelength: 405nm.

Recommended power Output: 100mw.

Maximum power output: 200mw.

Recommended Current: 50-100mA.

Threshold Current: ~30mA(~4v)

Recommended Operation Voltage: Automatically adjusted according to its I/V curve which will be about 4-4.5

Fit perfectly in 12x30mm Laser Case
